ENCORE: Intelligent Medicine Radio for March 21: Can surgical anesthesia accelerate memory loss?

written by Dr. Ronald Hoffman | March 23, 2026

New weight loss drugs may portend end of “Fat Acceptance” movement; Mid- and late-life exercise slash dementia risk; “Ethicists” urge more tick-borne meat allergy to save planet; How to detox 9-11 first-responders? Can natural herbs aid recovery from anorexia? Can surgical anesthesia accelerate memory loss? Bananas could be interfering with your smoothie’s health benefits; Chemical residues on produce impair male fertility; And more!
