Intelligent Medicine Radio for September 5: Brain Stimulation with Magnets for Cognitive Impairment?

written by Dr. Ronald Hoffman | September 7, 2026

Fish oil rivals effectiveness of antibiotics for periodontal disease; After American Heart Association green lights coffee, new study shows high consumption can accelerate bone loss; Scientists reveal how much exercise you really need to protect your heart—and no way are you doing enough! Is that prostate biopsy really necessary? Deep-brain stimulation with external magnets found to enhance brain function in mild cognitive impairment; And more!
