

# 'Tis the sneezon to “supercharge” your immune system

*I've long been a fan of the active ingredient of ImmPower-AHCC. I take it daily to support my immune system, and I've frequently prescribed it to patients with immune challenges. Now American Biosciences has teamed AHCC with fermented wheat germ extract to enhance its benefits; the result is ImmPower Plus. The science is clear—learn about it in the following article.*

---

***The Holidays are almost here and so are all the health threats that they bring, so now is the time to start preparing your immune system for the battle ahead.***

The leader in immune system support just got stronger! Introducing **ImmPower Plus**, the most advanced all-natural immune system formula available. **ImmPower Plus** combines the immune system strengthening qualities of ImmPower-AHCC with the

mitochondrial enhancing properties of *Fermented Wheat Germ Extract-Super Concentrate*, making a super immune booster that protects your good health like never before.\*

No matter where you live or what climate, this time of year always brings extra challenges to staying healthy and with the holidays quickly approaching, your good health will be under constant attack by everything this season brings, including every hand you shake, every hug you give and every gathering you attend. So now is the best time to become SUPER- IMMUNE...

How can you get your immune system into peak performance, fast? You can start with the basics such as eating well, exercising, getting plenty of sleep and doing your best to avoid alcohol and of course, NO smoking. However, for most of us, this is still not enough to prepare our immune systems for the battle ahead.

Your immune system will need a much bigger boost to maintain your good health. It needs something powerful, fast-acting and proven to work. It needs ***ImmPower Plus***.

***ImmPower Plus*** is more than just an immune booster. It works in two ways to help keep you healthy. First, it super-charges your immune system like nothing else because it boosts the most important part of your immune system...your Natural Killer cells or NK cells.\*

What are Natural Killer cells or NK cells? They are the most powerful, invader-killing cells in your body. Scientists discovered that your immune system's very first line of defense is this special type of white blood cell because they are literally born to kill! They constantly patrol your body for any abnormal or invading cells that, if left alone, can thrive in your body and destroy your health.

When you arm your body's NK cells and keep them strong, they go to work immediately and around the clock for you. They can quickly identify invader cells and inject them with cytotoxic granules that cause them to literally explode.

Next, ***ImmPower Plus*** contains *Fermented Wheat Germ Extract – Super Concentrate*. This "super-ingredient" has been the subject more than 60 published research papers, including its most recent paper that included a Noble Laureate as a lead researcher. *Fermented wheat germ extract* is the perfect compliment to ***ImmPower-AHCC*** because it helps to enhance both your Natural Killer cells and make your T-cells more active. It also helps your immune system to find and recognize those bad cells trying to hide and trick your Natural Killer cells. In one particular study, it helped the immune systems of children stay stronger, even though they were exposed to immune-system harming chemicals.\*

However, the most important and revealing research on *fermented wheat germ extract* –

*super concentrates* shows that it actually “rescued” mitochondria function. \* Why is this so important? Because mitochondria play a significant role in the aging process. According to a paper recently published in the medical journal “Aging Cell” researchers found a direct link between mitochondrial dysfunction and the shortening of telomeres, a key biomarker of premature aging.

This happens because mitochondria are responsible for generating energy in our cells. Reduced energy in our cells can lead to decreased health of our tissues and organs. Next, unhealthy mitochondria can cause damage to our DNA. Over time, this damage can contribute to the aging process and damage to healthy cells.

With the cold weather already hitting most parts of the country and the holidays just around the corner, don’t wait until its too late. Remember, you’re only as strong as your immune system and you’re only as healthy as your mitochondria.

***ImmPower Plus*** is your ultimate Holiday Season defense.
