Mastering Stress Management: Natural Solutions with Jim Lavallo

written by Dr. Ronald Hoffman | June 25, 2025

In this episode of the Intelligent Medicine podcast, Dr. Ronald Hoffman discusses stress and its various impacts on health with clinical pharmacist and nutritionist Jim Lavallo. They delve into the physiological mechanisms of stress, including cortisol's role and its effects on weight gain, thyroid function, and immune suppression. They highlight the widespread use and risks of long-term antidepressants, proposing natural alternatives like adaptogens

(such as ashwagandha) and lifestyle modifications (such as mindfulness and exercise). Lavalley also talks about the innovative health optimization programs at Lifetime gyms and the potential of emerging therapies like microdosing psychedelics and ketamine. The episode emphasizes the importance of a comprehensive, balanced approach to managing stress without over-reliance on pharmaceuticals.

Intelligent Medicine Radio Show for June 7

written by Dr. Ronald Hoffman | June 25, 2025

Intelligent Medicine Radio Show for June 7, Part 1: The promising use of the drug leucovorin, a potent form of vitamin B9, in treating autism

In this episode of *Intelligent Medicine*, Dr. Ronald Hoffman discusses the latest health stories, focusing on the promising use of the drug leucovorin, a potent form of vitamin B9, in treating autism. He reviews the research of Dr. Richard Fry and others exploring the role of cerebral folate deficiency in autism and how leucovorin may help alleviate symptoms. Dr. Hoffman also addresses the increased risk of sudden cardiac death associated with long-term use of antidepressants, based on new studies. Additionally, he highlights a recent FDA warning about severe itching as a withdrawal symptom from stopping antihistamines like Zyrtec and Xyzal after long-term use. The episode concludes with discussions on natural approaches to mitigate these health concerns and the potential benefits of quercetin for musculoskeletal health.

Intelligent Medicine Radio Show for June 7, Part 2: The effects of chlorine in swimming pools, solutions for managing chlorine exposure

Dr. Ronald Hoffman addresses various health-related topics including the effects of chlorine in swimming pools, solutions for managing chlorine exposure, the benefits of swimming, and the use of supplements to alleviate negative effects. He also discusses the benefits of CBD for overall wellbeing, as well as the impacts of excessive CT scan usage, including potential cancer risks. Dr. Hoffman tackles a caller's question regarding low blood cell counts and highlights the importance of seeing a hematologist for a thorough investigation. The episode also explores the potential effects of long-term use of oral contraceptives on brain health and mood disorders, as well as preventative measures for macular degeneration.
