

Q&A with Leyla Holiday Encore

written by Dr. Ronald Hoffman | December 31, 2024

ENCORE: Q&A with Leyla, Part 1: Cooking With Coconut Oil

- Highlights from Dr. Hoffman's trip to Lithuania
- Is there a brand of Boswellia you recommend?
- I would like to start cooking with coconut oil. What do you recommend?
- What is the guide to taking strontium for bone health safely?
- Should I get the Shingrix vaccines after 4 covid shots and the annual flu shot?
- I've always had my T3 and T4 checked for my thyroid but never T2. How does it work?

ENCORE: Q&A with Leyla, Part 2: Seasonal Affective Disorder

- Do I have to replace minerals when using a reverse osmosis water purifier?
- Is anyone tracking whether vaccinated or unvaccinated people are getting long covid?
- What supplements should not be taken with low-dose aspirin?;
- Can you talk about chelation therapy and cardiovascular disease?
- I want to get the right lamp for Seasonal Affective Disorder. What do you recommend?

Peptide Potential: Enhancing Health and Longevity

written by Dr. Ronald Hoffman | December 31, 2024

Jim LaValle, an internationally recognized clinical pharmacist, author, and lecturer, details the emerging field of peptide therapeutics. He discusses the basics of peptides, their roles in various bodily functions, and their therapeutic potentials, including weight loss, immune support, and injury recovery. Jim also shares insights on individualized dosage for GLP-1 drugs, regulatory challenges, the future of peptides in medicine, and exercise tips for seniors. Additionally, Dr. Hoffman explores Jim's role in spearheading the MIORA Longevity Program at Lifetime Gyms, aiming to make gyms not just places for workouts but comprehensive wellness centers focused on longevity and health optimization.

Intelligent Medicine Radio for December 21

written by Dr. Ronald Hoffman | December 31, 2024

Intelligent Medicine Radio for December 21, Part 1: 2024—A Year in Review

2024—a year in review (America’s worsening health picture); Obesity and cancer incidence rise in U.S. while healthspan declines; First-of-its-kind lawsuit takes aim at ultra-processed food makers; Nutritional support for childhood developmental disorders; Dr. Mark Hyman, integrative pioneer, gets the New York Times treatment; Can a blood pressure medication cause canker sores? Curbing Omega-6s, boosting Omega-3s, improves prostate cancer outcomes.

Intelligent Medicine Radio for December 21, Part 2: Wine is Good for Heart After All

New study says wine is good for heart after all—but should we drink more? How alcohol increases aggression by raising pain thresholds; Removing plastic chemicals can boost IQ, avert deaths, and save the world’s economy billions; Uterine thickening may be a prelude to endometrial cancer—can it be reversed? NIH study of green tea suggests it can; A new diagnosis of Sjögren’s syndrome has a caller spooked; Is the Internet making us dumber? Vitamin D in pregnancy gives kids stronger bones, but strikes out for diabetes prevention in healthy seniors; Dietary—but not supplemental—vitamin C curbs metabolic syndrome.

Q&A with Leyla

written by Dr. Ronald Hoffman | December 31, 2024

Q&A with Leyla, Part 1: Lifespan vs. Healthspan

- WHO Study on lifespan vs. healthspan in 183 countries
- Is there a danger in taking a supplement that enhances immunity if you have an autoimmune condition?
- I've had DCIS twice and feel I've received far too many mammograms. Can you discuss overtreatment?

Q&A with Leyla, Part 2: Overactive Bladder

- What does standardization in a supplement mean?
- Does the decaffeination process reduce beneficial polyphenols in coffees and teas?
- I've lowered my blood sugar but now my liver function tests are high. What gives?
- Is there a holistic treatment for hyperparathyroidism or is surgery the only option?
- What do you think of Gemtesa for overactive bladder?

Mastering Hydration: Avoiding Risks and Maximizing Health Benefits

written by Dr. Ronald Hoffman | December 31, 2024

In this episode of the Intelligent Medicine Podcast, Dr. Ronald Hoffman discusses the importance of hydration with Dr. Dana Cohen Integrative Medical Doctor and co-author of “Fuel Up: Harness the Power of Your Blender and ‘Cheat’ Your Way to Good Health.” They explore the often-overlooked role hydration plays in maintaining health and preventing chronic diseases. Dr. Cohen emphasizes practical strategies to improve hydration through diet and lifestyle changes. They highlight the risks of both dehydration and overhydration, discuss the impact of processed foods, and offer realistic solutions to help listeners incorporate better hydration practices into their lives. Too often doctors are dismissive of pop culture exhortations to pay attention to hydration. Except for those with specific medical conditions, the conventional mantra remains “In ordinary healthy individuals, thirst is a good guide to how much fluid you should consume.” In medicine, we routinely query patients about their diets, their exercise, their sleep, their stress levels, drug, alcohol and tobacco use, their social interactions, their spirituality, even their sexuality. But so seldom do we ask “How’s your hydration?” A recent review found that *“Hypohydration is known to reduce mental and physical performance, and more recent evidence suggests hypohydration also impairs vascular function and cardiovascular regulation.”* But adequate fluid intake is not merely a matter of optimization; a recent medical study sampling 1200 adults aged 51-70 suggests that it may literally be a matter of life and death: *“. . . underhydration was significantly associated with increased prevalence of obesity, high waist circumference, insulin resistance, diabetes, low HDL, hypertension, and metabolic syndrome. Over 3–6 years of follow-up, 33 chronic disease deaths occurred in the sample, representing an estimated 1,084,144 deaths in the U.S. Alongside chronic health conditions, underhydration was a risk factor for an estimated 863,305 deaths. Independent of the chronic health conditions evaluated,*

underhydration was a risk factor for 128,107 deaths.” How prevalent is underhydration in a sample of American adults? According to the study: “Nationally representative data from the National Health and Nutrition Examination Survey (NHANES) indicate that over 65% of adults aged 51–70 years in the U.S. do not meet hydration criteria.” The episode also touches upon broader health issues, contrasting dietary extremes, and the importance of accessible, enjoyable healthy eating habits.

Empowering Immune Health: Insights from Dr. Michael Karlfeldt

written by Dr. Ronald Hoffman | December 31, 2024

Dr. Michael Karlfeldt offers a deep dive into integrative oncology and the importance of immune support, especially during the winter season. He delves deep into the immune-protective benefits of fermented wheat germ extract and AHCC, which combine in ImmPower PLUS to offer comprehensive immune enhancement, cancer prevention, and treatment support. The discussion highlights the role of natural killer cell activity, the Warburg effect, and the adaptogenic properties of these supplements in addressing both cancer and general immune health. Practical dosing recommendations and Dr. Karlfeldt's insights into the integration of conventional and alternative therapies

provide valuable knowledge on how to bolster immune systems effectively. Use coupon code HOFFMAN10 at checkout to get a 10% discount and free shipping.

Q&A with Leyla

written by Dr. Ronald Hoffman | December 31, 2024

Q&A with Leyla, Part 1: Copper Supplements

- WSJ: Trump nominees 'hawking' supplements?
- Correction on Surgeon General Nominee Dr. Janette Nesheiwat's husband
- I have chronic fatigue. Do you think I would benefit from taking a copper supplement?
- Can I take garlic pills to help my eosinophilic esophagitis?

Q&A with Leyla, Part 2: Post Nasal Drip

- I've been taking Nexium for the last 20 years. Is this contributing to lower bone mineral density?
- Should my 83-year-old wife take more calcium for her osteopenia?
- What is your knowledge of Prolia? What are the side effects?
- I have mitral annular disjunction (MAD). Can you advise me?
- What can I take for my post nasal drip?
- Are there other blood thinners I can take where I don't need to check my INR?

A New Era in Wellness: Non-CBD Innovations with Lex Pelger

written by Dr. Ronald Hoffman | December 31, 2024

Lex Pelger, a biochemist and educator in cannabinoid science, details unique non-CBD supplements from CV Sciences that have similar beneficial effects on the endocannabinoid system as CBD. The discussion includes the benefits of CBD and cannabinoids, the new +PlusHLTH line (including Peace Gummies, Clarity Gummies, and Reshape Capsules), and their ingredients like berberine, cinnamon, and OEA for metabolic health. They also touch on regulatory challenges and the potential future of cannabis, CBD, and psychedelic research under varying political climates.
